

My choice of code editor → Visual Studio code / VS code

Installation process

- 1) Open your browser
- 2) Search "Visual Studio download"
- 3) Click on the link
- 4) download the .deb version since we use UBUNTU.
- 5) After the download is completed open terminal then
- 6) `cd ~/Downloads`
- 7) `dir`
- 8) `sudo dpkg -i C` (press tab after typing C for auto-completion)
- 9) ENTER
- 10) ENTER to select yes on the pop-up

To open VS code

```
cd ~/ros2_ws/  
code .
```

Extensions to install

- C/C++ by microsoft
- Robotics Developer Environment by Ranch hand Robotics LLC
- ~~cmake~~ CMake by twxs
- CMake tools by microsoft
